1

## FRONT GATE

Facility identification starts at the front gate. A well-marked facility adds pride, supports safety, and reinforces corporate branding.

Page 11

2

## PARKING LOT

Traffic control is central to safety in and around the building. From parking signs to bollards, we have it.

Page 8

3

## FRONT OFFICE

A warm greeting sets the tone. A front office is great for banners, safety scoreboards, wayfinding, and much more.

Page 18

### PRODUCTION ENTRANCE

Keep production teams informed of safety requirements and status as soon as they enter the facility. Motivational and informative signage can make safe choices a priority for all employees.

Page 24

### PRODUCTION FLOOR

PPE Dispensers and Signs help reinforce what safety equipment should be worn in a facility. The production entrance should remind all employees and visitors of the proper safety requirements.

Page 34

### WAREHOUSE

Stock and custom signs, SS Stone-Boards™, Site-Boards™, and more... Production floors benefit from the safety and organizational solutions we offer.

Page 46

**SHIPPING AND RECEIVING**

### BACK DOCK

The back dock presents the last chance to make a great impression, making it a key area to post critical safety information.

Page 66

 **Shipping:** A limited number of products are denoted with a (BOX) icon throughout this catalog - these items require special handling and must ship by truck/LTL. These items do not qualify for any special shipping programs and will be billed accordingly.

# Key Materials for Signs, Tags & Labels

## SIGNS

**Adhesive Vinyl** – Ideal for indoor and sheltered outdoor marking needs. Flexible vinyl with a printed matte surface. Permanent adhesive back with peel-off liner.

**Plastic** – Impact-resistant and pliable, plastic is durable for indoor and sheltered outdoor use. Print is protected by Sign Muscle® to guard against harsh abuse and even graffiti. Rounded corners with mounting holes.

**Aluminum** – Ideal for tough indoor and harsh outdoor locations. Rigid aluminum provides metal strength without rust. Print is protected by Sign Muscle® to guard against harsh abuse and even graffiti. Withstands wash-downs, abrasion, and chemical splashes—rounded corners with mounting holes.

**Reflective Aluminum** – Engineer-grade prismatic (EGP), reflective, .080" thick aluminum provides added visibility in low light conditions. Print is protected by Sign Muscle® to guard against harsh abuse and even graffiti. Rounded corners with center post-mount holes. Durable for outdoor locations.

**Lumi-Glow™ Plastic & Lumi Glow Flex** – A long-lasting, glow-in-the-dark, semi-rigid sign material that charges rapidly under any light source. It exceeds the safety standards, features, and benefits of safety grade photo-luminescent markings. The Flex material option is a 10-mil photo-luminescent vinyl with a permanent acrylic adhesive-coated back with peel-off liner.

## LABELS

**Adhesive Vinyl** – Flexible vinyl with the printed surface. Mount with permanent acrylic adhesive back with peel-off liner—ideal for indoor and protected outdoor placement.

**Magnetic Vinyl** – Flexible magnetic vinyl can place, lift, and replace on most steel or ferrous metal. The print has a clear overlamine to resist chipping and cracking.

## TAGS

**PF-Cardstock** – Pulp-free tags have no wood pulp or paper content, unlike standard cardstock tags, and are available at an economical price. Poly-based tags will not crack, distort, or shrink and can be used for applications indoor and short-term outdoor. Available in self-laminating.

**RP-Plastic w/ Grommet (Unrippable Vinyl)** – High-strength rigid plastic tag is ideal for use in industrial environments – resists chemicals, tears, and abrasions. The surface is easy to write on with a pen or marker, resist scuffs, and can be used indoors or temporarily outdoors.

## Pipe Markers

Pipe markers are to visibly identify contents, flow direction and hazard classification.

### Compliance Counts: ASME A13.1 Compliant - Identifying Piping Systems

ASME A13.1 Scheme for the Identification of Piping Systems "... a uniform system for the identification of piping contents has been established to warn personnel when the piping contents are inherently hazardous... this standard has been prepared to specify the identification of the contents of piping systems on the basis of legends, it also suggests the use of color as a supplementary means of identifying the type of hazard of the material contained in the system."

# The 5 Steps To 5S SUCCESS

## 1 SORT

Remove all items that are not used or needed in the work area.

## 2 SET IN ORDER

Find the best location for remaining items, set inventory limits, and place temporary labels, lines and signboards.

## 3 SHINE

Clean, repair, and paint everything, inside and out. Prevent dirt, grime, and contamination from reoccurring.

## 4 STANDARDIZE

Write 5S SOP for maintaining and controlling the first 3.

## 5 SUSTAIN

Maintain established procedures by continuously auditing and improving processes.

## OSHA/ANSI Signage

Safety is often the 6th "S". Ensure your facility is in compliance with workplace safety identification.

## Shadow/KPI Boards

Organize what matters with stock and custom shadow boards, and measure what you treasure with custom KPI boards.

## LED Sign Projector

Shine the light. Project your message for added attention and visibility.

## Tapes

Floor tapes provide excellent visibility for floor marking requirements.

## Banners

Promote It! Reinforce company policy or motivational messages with large attention-grabbing banners.

# PERSONALIZE IT! ...In 4 Easy Steps

## STEP 1

Choose Your Material

General Purpose Composite/Aluma-Lite™

Industrial Grade Aluminum

Pro Series™ Acrylic/Accu-Shield™

## STEP 2

Measure

Measure the space where your shadow board will hang. Or let us know if your board will need to be mounted to a mobile cart.

## STEP 3

Tell Us About Your Tools

### Option 1

Take a clear, straight on picture of each tool next to a ruler. Provide us with a general overview of the estimated size of the board need.

*Robert Half Tools Utility Pliers Item #342454 Model # 33268*

### Option 2

Provide a list of tools along with their manufacturer, part number, and description.

## STEP 4

Provide us with:

### Your Logo

High res/vector art

### Your Colors

Background, shadow, font colors

### Your Message

Tool names, part numbers, department

## 5S SHADOW BOARDS

## A Place for Everything and Everything in its Place

### DID YOU KNOW?

Properly deployed shadow boards can reduce administrative and production costs – increasing profitability at your location.

## Mobile Cart Solutions

Push SS-Compliance or Communication Where It is Needed Most.

Mobile carts provide a maneuverable solution to perfectly support the organization of cleaning equipment, tools and more within the workplace, in addition to delivering point-of-need communication.

Available in three sizes, mount stock or custom shadow or KPI boards to these anodized aluminum frames with casters and move from workspace-to-workspace as needed.

### About our Mobile Carts

- Three popular cart sizes
- (4) Swivel, locking casters; zinc-plated steel housing
- 2" diameter rubber coated wheels
- Some assembly required; instructions and assembly hardware included
- Mobile Carts can hold two boards, one per side
- MCD1 fits our Janitorial (Dry), and Wet & Dry Zone Cleaning Station Store-Boards™
- MCD2 fits our Janitorial (Wet) Cleaning Station Store-Boards™
- Custom boards can be designed to fit mobile carts

Item No.	Size	Unit

At AccuformNMC, we combined the *best-of-the-best* in sign protection to offer you the new and improved Sign Muscle<sup>®</sup> to increase the longevity of signs, labels, and more.

# SIGN MUSCLE<sup>®</sup>

## Sign Muscle<sup>®</sup> preserves the life of your signs and labels!

Our NEW & Improved Sign Muscle<sup>®</sup> formulation is powerful enough to survive in most environments...and it's patented\*.

Pioneered more than a decade ago, our scientifically strong liquid laminate protects your identification product from virtually any hazard. Durable, strong and resilient, Sign Muscle<sup>®</sup> delivers protection – guaranteed.

A sign that lasts starts with a quality base material. For example, an industry-tested material like plastic versus a typical competitor material with unknown origins. The wrong base material can speed up damage to the potential life-saving safety message that sits on top. A message that guides a workforce to safety is a message that we can't allow to fade.

Longevity through quality also means scientifically engineered ink-sets specifically created for the materials they will be printed on.

*That's the difference, driven by facts and supported by science. Resist fading and easily restore like new!*
